

ITS Dental College is proud to run 7 satellite centers that are all dedicated to provide oral health care solutions specifically for the people at the lower end of socio economic strata. The centres also work to widen the clinical opportunities and broaden the perspective for students pursuing dentistry. Through tailor made educational awareness programmes, these centers inculcate sound oral health care and practises among the rural population. The treatments and services given in the centres are not only of the highest quality standards but are also cost effective when compared to private clinics. Moreover, in case of any advanced dental treatment, transport is provided to and from on a regular basis for the patients to ITS-CDSR.
