

I.T.S CDSR is regarded as a laudable institute for dental studies, where the committed faculty and proficient administration leave no stone unturned to smooth the progress and pass on unrivaled education and valuable skills meticulously. The core philosophy of active learning with a gamut of interactive activities is the hallmark feature of the institute.

The teachers and the students are regularly sensitized and groomed at periodic intervals by Conferences, Continuing Dental Education (CDE) Programs along with Workshops of National & International Level to endow them with congenial climes in order to endorse rigorous exchange of knowledge, information and technological update.

Basic Life Support course is conducted periodically for training faculty and students for management of victims of life threatening illnesses or injuries until they can be given full medical care at a hospital.

The college hosts **Implantology** training modules in collaboration with the Bioner Implants (Spain), for undergraduates (interns), postgraduates and faculty for improving skill and proficiency in placing dental implants. The participants who are part of this exclusive program get an opportunity to place two implants each in anterior and posterior regions of the oral cavity. The course is certified by the International Congress of Oral Implantologists and the Universidad Catolica San Antonio de, Murcia (UCAM), Spain. All the clinical and academic modules are conducted in association with renowned international and national implantologists. Faculty members from the Department of Prosthodontics, Oral Surgery and Periodontics are an active part of the teaching program.

To augment the diagnostic acumen of the faculty and students and buttress learning, Continuing Education Programs (CDE) are regularly conducted on **Cone Beam Computerised Tomography** (CBCT) Machine functioning, wherein postgraduate students and faculty are trained at length to understand and assimilate the fundamentals of this latest modality.

With a growing number of patients and an increased demand felt for aesthetic crowns and bridges, the institute regularly conducts training modules for **Advanced CAD-CAM System** to provide the postgraduate students along with faculty with a hands on experience of the latest technology.

Owing to progressions in the sphere of **LASER Dentistry**, the institute has extended support to its faculty members and post graduate students to gain added exposure in this field by virtue of various workshops and advanced training modules of National and International repute.

The college is steadily ambling towards the pinnacle of excellence without deviating from its cherished philosophy of maintaining excellence in teaching, learning and rendering high standards of service to the community. The **Facial Aesthetic Course** comprising Certificate Programme in Medical Cosmetology in association with Pskov State University, Russia and certification by COCTASI provides opportunity to the faculty and students to visit the Pskov University, Russia campus for International Observership program. Students can also get a chance to pursue an Internship at Dreamderma chain of Esthetic Clinics in NCR.

Thus the college is distinctively ubiquitous for excellence in academics, commendable patient care and highly competitive environs to meet the need of tomorrow's dentists from today's perspective.
