DIRECTOR'S REVIEW

I am happy that the 11th Annual Report for I.T.S Centre for Dental Studies & Research, Murad Nagar, Ghaziabad has been published with a detailed description of the institute's activities.

I.T.S Centre for Dental Studies and Research was established by I.T.S Group of Institutions in 1995 under the able guidance of our esteemed Chairman **Dr. R.P Chadha**. I.T.S – CDSR was recognized by DCI for BDS course in 2005 and MDS in 2009, it is also a NAAC – A grade institute. I.T.S Group of Institutions is recognized as the one of premier private institution in the region.

Our Chairman has envisioned various systems like express and VIP cards and has introduced new software for quick and instant treatment of patients in the OPD. These activities of the institute have helped achieve a better service to the patients. The students of our institute brought great laurels both in the field of academics and extra-curricular activities.

The college has made tremendous progress in all academic, non-academic activities relevant to staff and students. During the academic session of 2021-2022, I.T.S group successfully organized National & International Conferences, PG Conventions, workshops and CDE Programmes.

The institute made another giant leap in the field of education as prominent name in the country by being Re-accredited by NAAC with Grade "A".

For the corresponding academic year the total intake was 45 postgraduate and undergraduate intake was 100. The postgraduate students immediately after joining the college are finely tuned to basic sciences and also research methodology. The undergraduate students under the mentor system have shown tremendous progress. Mentor is a faculty member and students are divided into small batches, throughout the year of study. Main aim is to mould the student in a better way and also to enlighten students on the benefits of dentistry and encourage them to achieve greater milestones.

We have introduced oral implant courses for undergraduates as well, which will help in boosting their confidence level. This is based on the institute's progress in the field of dentistry. The total OPD in year 2021-2022 has increased.

I.T.S Dental College, Ghaziabad has been accredited by the **National Accreditation Board for Hospitals & Healthcare Providers** (Constituent Board of Quality Council Of India) for all specialities of Dentistry. This is a one-of-a-kind achievement which no Dental college in North India has ever achieved before.

The faculty members are encouraged to participate in various training programs and are given the liberty to come up with various research activities. All these help in adding on to research work for betterment of the society.

Our college has a continuous evaluation system. We regularly conduct Tests & Assignments at knowledge level, Group discussions, seminars, quizzes at comprehension level and Case studies, Projects.

I wish the students, faculty and the institute to make greater progress in the field of dentistry and make the I.T.S Centre for Dental studies & Research, a premier institute.

The institute organized various conferences, workshops, cultural activities and organized celebration of various important days such as:

TOBACCO CESSATION CLINIC

I.T.S – Dental College has started with the Tobacco cessation clinic from 31st May 2016. The centre was inaugurated by the SDM, Modinagar – Mr. Atul Kumar on the occasion of “World No tobacco Day”. The centre is managed by the Dept. Of Public Health Dentistry and the patients are made aware of tobacco products and its ill effects. They are counselled and motivated for the cessation of the habit. ITS – CDSR acknowledges the fact that Uttar Pradesh being the “Gutkha belt” needs reinforcement/ counselling among patients to quit the dreadful habit making TCC the most effective way of health intervention to reduce the impact of tobacco related mortality and morbidity.

Tobacco cessation clinic is well equipped with intra oral camera, LCD screen and Carbon monoxide monitor. TCC has been providing varied services as listed below

1. Breath Analysis using Carbon monoxide monitoring
2. Intra- Oral Camera Screening & counselling
